

Ceramic Panini/Contact Grills **hallco**

Not only do our range of glass ceramic contact grills look stylish, but their performance is top class too. The main advantage of having a ceramic finish is the fast heat up time.

Add to this the natural non-stick characteristics and ease of cleaning and you've got a winning combination. In minutes our contact grills can cook great burgers, chicken, fish or steaks with ease. All models operate from a single 13 amp supply so fitting one of these equipment gems into your kitchen is fuss free.

Quality Italian manufacturing standards are backed up by a 1 Year Full Warranty.
